

## RECYCLING

Items such as newspaper, glass, and cans have a market value when separated out from the rest of your household trash. When collected in large volume, these items can then be sold to companies that will process them for use in new products. This is called recycling.

MORE THAN 50% OF THE WASTE GOING TO LOCAL LANDFILLS IS RECYCLABLE.

Do you currently recycle anything?

☐ Yes

☐ No

-----> GO TO NEXT PAGE ----->

How often do you use a recycling station to drop off your household recyclable materials?

☐ Every month

☐ Approximately every other month

WHETHER YOU ARE RECYCLING NOW OR NOT, for each item listed below, please think about:

- The amount of the item your household generates
- The space you have to store the item
- The effort required to contain it

If you were to separate this item out from your household trash for purposes of recycling, how often would the item need to be removed from your household property?

	Every Week	Every Two Weeks	Every Month	Every Other Month	Don't generate enough of this item to need removal even every other month.
