

# **A** *nnouncing an exciting recycling education program for third grade classrooms!*

Dear Third Grade Teacher:

Your school has been selected for participation in a recycling awareness program, designed to coordinate with your existing third grade science unit on solid waste (Lessons 20-22, pgs 285-309). This recycling program provides the following events for each participating class:

- **Pre trip classroom presentation**
- **FREE all day field trip to Leslie Science Center and City of Ann Arbor Materials Recovery Facility (MRF)**
- **Packet of supplementary recycling activities**
- **Support with your school-wide recycling program (optional)**

These events will be scheduled during March 1998. Two or four classrooms from each school may participate in this program. Field trips are provided for two classes at a time, so plan to schedule your field trip jointly with another third grade teacher. **Space is limited.** Please call Leslie Science Center at 662-7802 between 12:00 and 4:00 PM for more information and to schedule your joint trip now.
