Inside the City of Ann Arbor's new

# RECYCLEPLUS

## **PAPER & FIBERS**

NEW! Now papers can be mixed together — newspapers, magazines, catalogs, mixed office paper, junk mail, and paper bags no longer need to be bagged. Envelopes with gummed labels and plastic windows are acceptable as well as "sticky notes" and crayon-marked paper. (The labels, crayon marks and glues float to the top of the water and are skimmed off during the paper fiber re-pulping process. The labels are not recyclable, but they no longer create problems for paper recycling.) Please cover papers at the curb to prevent blowing and to protect from rain. No plastic envelopes, such as "tyvek" — if you can't tear it, don't recycle it. No plastic or metal binders, clips or tags. Remember to remove the boxboard backs of notebooks and recycle separately, as described below.

NEW! Paperback books have been added to phonebooks and are collected all year. No bardcover books.

NEW! **Textiles**, including paired shoes and socks, linens and clothing should be placed in a sealed plastic bag. Clear or transparent plastic bags work best. If a dark plastic bag is used, it must be clearly labeled "Textiles" on the outside, otherwise the bag may be easily mistaken as refuse and not collected as a recyclable. The labeled plastic bags may be placed in or outside of the tan "Newspaper" recycling bin. The textiles are shipped to another location for sorting into reusable clothing and linens and material to be recycled into such products as car insulation and carpet padding.

NEW! Also known as "grayboard," **boxboard** was formerly taken only at the Drop-Off Station. Now residents can recycle this material from home. Boxboard tends to be made of very short paper fibers suspended in a glue base, similar in concept to "chip board" used in construction. Boxboard can contaminate other paper types during recycling and should be kept separate.

### **CONTAINERS**

NEW Plastic recycling is now as easy as 1-2-3. Plastic bottles #1 (PET or PETE) and #3 (PVC) have been added to the current #2 (HDPE) bottles for recycling. When choosing and using plastic bottles, look for the number on the bottom inside a triangle. If there is a number 1, 2 or 3 listed on a bottle, jug or jar, then this container, when empty and rinsed, can be placed in the green Containers recycling bin. Notice that only "bottles, jugs and jars" are mentioned for recycling. Plastic tubs (such as are used for margarine and yogurt) and plastic bags may be numbered 1, 2 or 3, but are made of another type of plastic and are not recyclable at this time. Types of containers that are made of #1, 2 and 3 plastics include milk and laundry jugs, water bottles, pop bottles (but return these for the Michigan bottle deposit!), shampoo, salad dressing, peanut butter, liquor, cleansers, etc. No motor oil bottles or other bottles that have beld a toxic substance.

NEW! **Ceramics** includes clean, broken dishes, terra cotta flower pots, pyrex, and drinking glass. *No light bulbs. No plastic dishware, flower pots, styrofoam cups or packing peanuts.* 

NEW! **Empty aerosols.** Please leave on the lids to help reduce any possible spills. Call the County Home Toxics program, 971-7356, for the proper disposal of unused toxic aerosols.

NEW! Metal can collection has expanded to include household **scrap metal**, such as pots and pans, metal pipes and other items up to 1 cubic foot, weighing up to 20 pounds. Electrical appliances are not recyclable.

NEW! Milk cartons and "aseptic or tetra pak" juice boxes. The new MRF operator has developed a unique recycling market for these specialized items. Please continue to discard other waxed food boxes or ice cream boxes because they will contaminate the recyclability of milk cartons (and will contaminate boxboard, too).

#### **A Word About Toxic Materials and Waste Reduction**

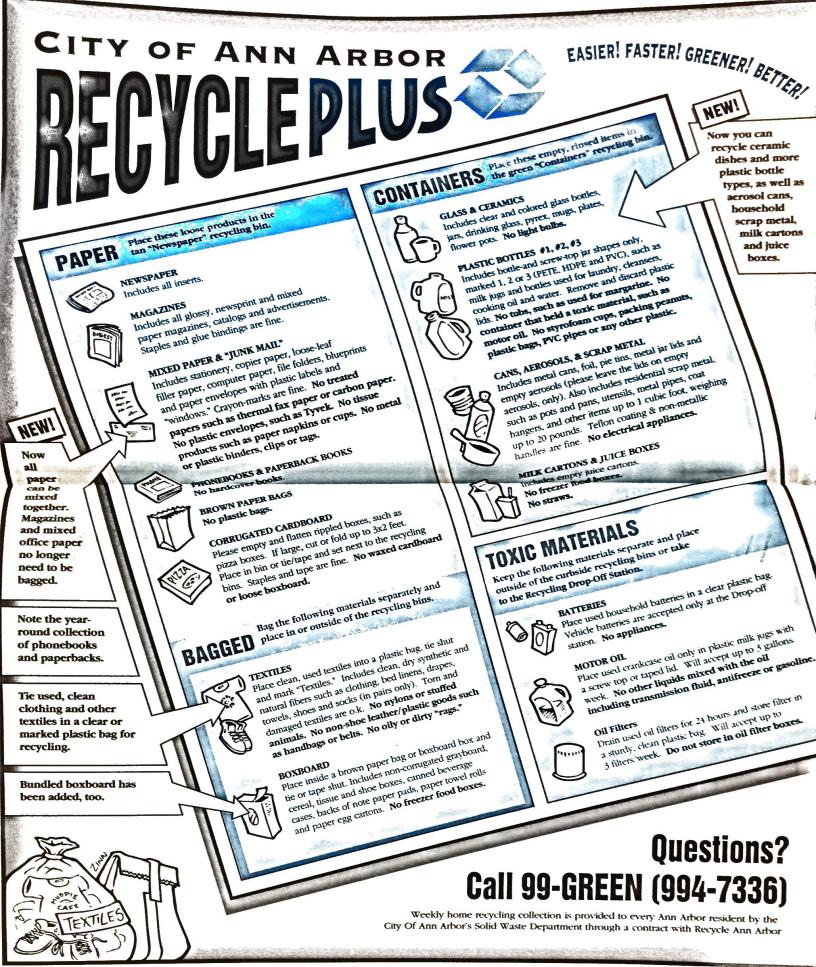

To avoid hazardous waste spills and accidents, household batteries, motor oil and oil filters are only collected along curbside collection routes and at the Recycling Drop-Off Station. Do not place these materials next to recycling carts or by dumpsters.

Remember to Reduce, Reuse, then Recycle. Please continue to support your favorite reuse centers, such as local charities, used book outlets and resale stores with your usable textiles, paperback books, pots and pans. Let the recycling program take the clean materials that are left over.

To help launch the new RecyclePlus program, several voluntary distribution methods will be used for this brochure. Some residents *may* receive more than one copy of this information. Please share or recycle it.

INTRODUCING CITY OF ANN ARBOR

Opened in August 1995, the City of Ann Arbor's new Material Recovery Facility (MRF) accepts the materials described in this RecyclePlus brochure. The MRF is owned by the City of Ann Arbor and operated by Resource Recovery Systems of Centerbrook, CT on behalf of the City. Recycling collection services are provided
