

Starting January 1998, the City of Toronto is scheduled to start sending all of its garbage to the BIF Landfill in Washtenaw County. On October 24th & 25th, NO WASTE of Michigan and The Ecology Center will be personally delivering thousands of letters of protest to Toronto officials. We are calling on Michigan to place a moratorium on new landfills and incinerators and ban out-of-state waste. We are calling on Toronto to tear up their waste contract and manage their own waste close to home.
