

# COMBINE YOUR STRENGTH: COMMIT TO THE RIGHT TO ACT PRINCIPLES

## RIGHT TO ACT WORKPLACES

### COMMIT TO:

The reduction and elimination of toxic threats in and outside the plant

Advocating the right to refuse unsafe work as well as work which is environmentally dangerous

Meeting with local environmental groups to find common ground

Standing with community activists in their major campaigns

Advocating the community's right to a safe neighborhood and to be involved in decisions which effect their health and well-being

Developing contract language which seeks to reduce toxics inside and outside the plant

Supporting Right to Act and Toxics Reduction legislation

Donating to the Right to Act Campaign and endorsing the principles

Forming or maintaining an effective health and safety committee

---

Workplace or Local

## RIGHT TO ACT COMMUNITY GROUPS

### COMMIT TO:

The reduction and elimination of toxic threats in and outside the plant

Advocating only those environmental clean-up or control strategies which do not further endanger workers' health

Meeting with local labor groups to find common ground

Standing with worker activists in their major campaigns

Advocating the workers right to a safe workplace and to be involved in decisions which effect their health and safety and their livelihood

Including worker health and safety improvements in any goals you present to a company

Supporting Right to Act and Toxics Reduction legislation

Donating to the Right to Act Campaign and endorsing the principles

Forming or maintaining an effective environmental group in the community

---
