

Dear Parent,

In an effort to reach the community, the Ecology Center is visiting various schools to inform them about the benefits of recycling. Today we had a presentation in your child's class. The presentation's purpose is to make children aware of the crisis in solid waste disposal, and other current ecological issues, by showing them slides or a children's movie about recycling. If you are interested in recycling at home or finding out more about recycling please look at the brochure we sent with your child, and if you have further questions, feel free to call us at 971-7400.

Reduce , Reuse, Recycle
